

Presentation

Advanced Technologies Building Automation

Established in 1984 our company, AD SA, is working with many partners in the conception and realisation of innovative technical systems in mechanics, in electronics and in electrotechnics.

Our company has acquired an important know-how in the entire world in the engineering, in the realization, in the programming and in the starting of technical systems, of industrial production machines as well as of electronic devices.

The fields in which we have acquired an important know-how are:

- Plastic material extrusion for cable manufacturing and for pipe production.
- Metal forming and welding systems with laser or WIG
- Irrigation systems for agriculture.
- Water treatment.
- Food industry.
- Renewable energies.
- High frequency sorting machines.
- Assembling machines.
- Galvanoplasty.

According to our philosophy the realized creations belong entirely to the client. For that purpose, if the created system seems to justify a patent, we can take care of the patent registration procedures for you.

It would be an honor for us to be able to participate in one of your realization with you and to make one of your wishes come true.

Don't hesitate to contact us for a visit or for an offer. We will be pleased to study your request in full confidentiality and without any commitment from you.
